Education

Carnegie Mellon University

May 2028

Bachelor of Science in Electrical and Computer Engineering — Dean's List

Pittsburgh, PA

- Relevant Coursework: Linear Algebra & Vector Calculus, Principles of Imperative Computation, Physics I, Intro to Electrical & Computer Engineering, Concepts of Mathematics, Introduction to Computer Systems

Experience

Nokia Bell Labs

June 2026 – August 2026

Incoming Optics Hardware Intern

Murray Hill, NJ

- Contributing to a collaborative prototype development project between Nokia Bell Labs and Google.
- Specializing in FPGA design, PCB design, and GPU optimization for real-world Distributed Acoustic Sensing systems.
- Optimized circuit test procedures using a flying probe machine, improving efficiency in PCB validation workflows.

ScottyLabs — Carnegie Mellon University

January 2026 – Present

Labrador Developer

Pittsburgh, PA

- Contributing to ScottyLabs, a student-run organization dedicated to building tech that enhances campus life at CMU.
- Currently developing an alumni networking platform to connect CMU students with alumni across industries.

Pfizer Inc.

September 2024 – January 2025

Student Intern

New York, NY

- Collaborated with two teammates to develop software access classification models successfully integrated into Pfizer workflows to streamline access to critical software and hardware.

India Institute of Technology (IIT)

February 2024 – June 2025

Research Intern

Remote

- Collaborated with an ECE professor on a machine learning program that identified anomalies in beehive acoustics, advancing understanding of bee behavior in response to climate change.

Hack4Impact

June 2023 – June 2025

High School President / Founder

High Bridge, NJ

- Launched the first high school chapter of Hack4Impact, a university-affiliated nonprofit, and led student teams in building software solutions for community organizations.
- Guided semester-long projects with environmental groups including the Hudson River Foundation and Nature Conservancy.

Office of Senator Vin Gopal

June 2024 – August 2024

Legislative Technology Intern

New Jersey

- Researched AI usage in large-scale data centers and contributed to drafting legislative language for a proposed state bill on AI governance and infrastructure oversight.

KronML

December 2023 – October 2024

Founding Intern

Remote

- Designed and implemented the company's intern onboarding and development process at an early-stage AI startup.
- Built a long-term machine learning automation pipeline to reduce manual operational tasks.

Awards & Recognition

- **American Junior Academy of Science (AJAS)** — Awarded 1st Place at NJAS for environmental research; presented findings at a national conference.
- **Columbia Science Honors Program (SHP)** — Selected to a small cohort of students for this prestigious STEM program; pursued advanced environmental coursework.
- **National Merit Scholarship** — Received National Merit Scholarship commendation.
- **Classical Languages** — Received Latin Seal of Biliteracy; awarded a "Perfect Paper" score on the National Latin Exam.

Technical Skills & Interests

Languages: Python, Java, MATLAB, HTML/CSS, JavaScript

Hardware & Tools: FPGA Design, Optical Test Equipment, Oscilloscopes, Signal Analyzers

Software & Frameworks: Git, NumPy, Scikit-learn, TensorFlow, React, Node.js

Areas: Machine Learning, Embedded Systems, Optics Hardware, Signal Processing, Data Analysis

Interests: Basketball, Poker, Energy Systems, NBA, Anime, Shoes, Music, Food
